Highlights and bookmarks share support feature Reading Statistics Sync/Backup /Download Book Files via Dropbox or WebDav Widget Support, group your favorite books, put them download: frequently asked questions: Press: Contact: seanyword - gmail.com Privacy Policy You liked the free version of Moon Reader and decided to go Pro or just pro bought version from the beginning, in any case, you made the right choice. Whenever you go Pro with the app, you like features that you wouldn't normally experience with the free version, and the same with this app. It also has a beta program where you can sign up to check out features that haven't been released for everyone yet. Exclusive Moon' Reader Pro FeaturesThe difference between a free and paid version of Moon Reader is that with a paid version, you get a lot more features. For example, the features that you get only with the pro version: No AdsShake talking (Text to speech, TTS engine support)More themes, background images, and fontsReading feature statsCustomize the function of the Reading BoardHeadset and Bluetooth controlName keys replacing the role of reversalMulti-dot touch supportPass to protect the appBook on the home screen of shortcutAnnotations, Highlights - Bookmarks share support supportWidget Shelf supportPut your favorite books put them on your desktop as a widgetAs to import files or a book to do so: Click on three points in the top right version of Import BooksChoose, from where you want to import the book fromtap OKThe app will show you all supported it was able to find. Choose the ones you want and click on the import button in the bottom right corner. As you highlight the text and customize the Colorsif you came across for something you want to find later, stressing that it is necessary quickly. To highlight the text, you'll see a long press on the text and various selection options. For example, you can highlight the text by using:UnderlineSquiggly linesCross throughColorOnce you decide how you want to highlight your text, you can also customize it and change the colors by default. To change the default colors, click on any text and select Highlight. Click on the drop out color menu and create your color. Once you Click on OK. How to clean up all or specific highlighted TextMaybe that you highlighted at first is not so important after all, and now you want to erase it. To remove a specific word or phrase you've singled out, you can click on the text you've highlighted and click on the garbage icon. If you can't remember where the highlighted text is click on the percentage that tells you how far along with the reading you are. The app will show you all the words or phrases you've highlighted so far. Click on any of the three points on the right. Choose to either erase this particular text or erase them all. How to add a book to your favorites and change the cover of a book there are ways to make a book more convenient to find, to tag it as one of your favorites. To do this, click on the book and click on the book icon with a star in the middle. Another way to add any book to your favorites is by opening a book. You can do this by clicking on time in the bottom right corner. Adding to my favorites should be in the bottom right corner. When you click on the option, you can change the name, name of the author, add a description, add or remove tags and add a filter to read. If you have a book whose book cover you want to hide, you can do so by long clicking on the book and selecting the cover as an icon. Click on the Choose cover option and select one of the options available. How to create and manage bookmarks To create a bookmark, click on the percentage at the bottom and click on the option that says Add a new Bookmark.After a while, you have created so many bookmarks that have the text you need to have on hand that trying to find a specific almost mission impossible. To find what you need, you can use the search option for easy search. To find the text, click on the percentage again. In the bottom right corner, and click on the search icon in the bottom left corner. If you want to go to a specific bookmark, search for it and click on it from the results. You can also have your bookmarks sorted by time as long as you have the side page open. Click on the cogwheel next to add a new bookmark option and check the field for sorting by time. How to get free BooksMoon' Reader has a section where you can install free books to read. For example, you can download free books such as Pride and Prejudice and others. To get free books, go to the app's homepage and click on the three lines in the top left. Choose the Net Library option and then where you want to get the free book from. If you get a book from Project Gutenberg, you can choose a book from sections such as Popular, Last or Random. Choose the book you want (twice) and to finish things, click on the download button. How to customize how your books are sorted It's also possible that the bookshelf is sorted exactly the way you want them to be. Click on which looks like a flashlight at the top and you'll see all the ways you can sort out the books. In the Section Sorting section, you have options such as:Book titleAuthorimport TimeOrage Time listIn The Read Filter, you have options such as: In the type of shelf, you can change the style of the shelf. Starting from left to right, this is what your bookshelf will look like with every option. Concluding Moon' Reader Pro is great if you handle different types of files. Not only does it support different types of files, but it also offers a beautiful design as well. What do you think of the app?
